

Guide to take Images required by Insurance Companies

First of all Insurance Companies require Identification Images of your Vehicle. This Shows them that the vehicle they are paying to repair is the one they have insured. The Images required are as followed:

One from each corner of the vehicle showing the length and width of the Vehicle.

Next is an image of the VIN Number. As you look from the Front of the vehicle the VIN Number will be in the bottom Right hand Corner of the windscreen and will look similar to this:

Next they require a picture of the Dashboard with the Engine running and the Mileage Showing:

That's all the ID images the Insurance require. Now we need images of the damage. First of all take a picture of the Overall damage area:

Next Take Images of the Individual damaged panels. Please take one image side on, and one from each end as Follows:

REAR WING DAMAGE

From the rear

Side one

From the Front

REAR BUMPER DAMAGE

Once you have taken the images of the Damaged Panels Then We require images of the damaged Components Like so:

Damage rear Lamp Damaged

Broken Parking Sensor in the Bumper

Hopefully that will be all the Images your insurance Company require. If you could kindly send these images to enquiries@brinjones.co.uk we will use them to Produce an estimate for your insurance Company.
